

Handcrafted Pixel Folders for Unity

Table of Contents

Features	1
How to Install	1
Customization	1
Script Reference	2

Make your Unity project easier to navigate—and a lot more cozy— with colorful folder icons! This simple Editor extension lets you assign pixel art folder icons in just a couple of clicks.

1. Features

- 23 handcrafted folder icons in a variety of colors
- Works in both grid view and list view in the Unity project window
- Lightweight and editor-only system that does not affect builds
- Automatically drawn over Unity's default folders
- Easy to extend with your own custom artwork

2. How to Install

- Download from the Unity Asset Store and follow the prompts to import into your project
- You'll now see new context menu options when right-clicking folders in the project window
- Right-click > Set Custom Folder > Vibrant
- Right-click > Reset Folder To Default

3. Customization (optional)

- Add your own PNG icons to the "Editor Default Resources/Handcrafted Pixel Folders" folder. (The custom folders included are 16x16.)
- Update the script dictionary and menu to recognize your new folder icons.

4. Script Reference

This tool uses a shared core + package script:

Assets/Editor Default Resources/FolderIconCore.cs- shared core that registers the Project window GUI callback (`EditorApplication.projectWindowItemOnGUI`) and draws icons from a central `folderIcons` dictionary.

Assets/Editor Default Resources/[FolderIconAssetPostprocessor.cs](#)- package-specific script that registers the folder icon textures with the core and uses `EditorPrefs` to store per-folder icon assignments; the icons are rendered over Unity's default folder icons in the Project window.

License

This asset pack is licensed for use in both personal and commercial projects. By downloading this package, you are granted permission to use the included pixel art folders in your games, prototypes, tools, or other creative works. You can modify the assets to suit your needs. You may not redistribute or resell as assets. Attribution is not required, but always appreciated.
